

## Company Overview

TableTop Media (TTM) is a Dallas-based media technology and content management company that has created the first digital promotion and pay-at-the-table device for the casual dining restaurant market.

The technology, called the Ziosk®, resides on each table and enables the guests to see promotions, play games, watch movie trailers, order selected food and beverage and 'pay on demand' when they are ready to depart.

TTM provides significant value to the restaurant by increasing revenue, table turns, email marketing enrollment, improving guest satisfaction and reducing costs.

TTM is currently working with large casual dining chains and is observing positive results from the guests, sponsors and restaurants.
